# PRESS RELEASE

## CSS Adds Two Decades of Experience to JDE Practice

**Charleston, South Carolina (July 27, 2011)** – Jay Leis, a veteran consulting professional with a focus on system transformations, joins CSS as a Director in our JD Edwards practice. Leis will leverage two decades of experience in enterprise systems strategy and global ERP implementation to help CSS clients across the nation meet their business goals.

Leis came to CSS from Oracle where he managed the JD Edwards portfolio for Oracle's Consulting Practice across 13 states. "When considering a change, I looked for the organization that leads the pack delivering JD Edwards' services. CSS has been recognized time and time again for its work with JDE. It was clear to me that this was the best place to be. I'm excited to be part of this top-notch team. We will use our collective knowledge to help JD Edwards clients get the most out of the solutions," Leis says.

A former practice manager at Deloitte Consulting and Arthur Andersen, Leis has served as a trusted adviser to executives in industries such as Industrial Manufacturing & Distribution, Industrial Chemicals, Consumer Goods and Life Sciences.

Leis' industry and application experience will add strength to CSS' robust JDE practice. "CSS has a reputation for bringing on the best talent in the industry – we won't settle for anything less. The experience and passion that Jay brings to the table was a natural fit for the company and we're thrilled that he'll bring his extensive experience to the CSS family," says Kirk King, CEO, CSS International.

### **About CSS:**

CSS is a leader in deploying Oracle enterprise solutions for mid- and large-sized companies. CSS offers a single source for all application, technology and process implementation and business process improvement needs. The CSS project approach is based on decades of industry experience, a unique Change Management program, sustainability and a deep-rooted sense of professional integrity. CSS exclusively supports the Oracle product line and is a multiyear Oracle North America Titan Award winner for excellence in sales, marketing and solution development and deployment. With an unmatched record of success, CSS has helped hundreds of companies implement complex technology solutions. CSS is headquartered in Charleston, SC, with operations throughout the United States.
