## PRESS RELEASE

## Internationally Recognized Supply Chain Expert Joins CSS to Lead Central Region

**Charleston, South Carolina (June 21, 2011)** – Kenny Ecton, a veteran of dozens of Oracle Manufacturing & Distribution projects—and a global thought leader for Oracle Value Chain Planning (VCP)—has joined CSS to head up delivery activities in the company's Central Region.

Ecton is highly sought-after in the industry and chose to join CSS because of the company's culture, delivery methodology and reputation within the Oracle partner and customer communities. "If you consider CSS' success within the Oracle market and its dedication to a multi-industry supply chain community over the years, it was a natural fit for me. I'm looking forward to growing with the team and taking our collective knowledge to the field for real bottom-line impact with companies who embrace Oracle technology as we do," said Ecton.

A former partner and VCP Practice Leader at IBM Global Business Services, Ecton has helped some of America's top brands gain bottom-line value through improved supply chain performance, including Logitech, Navistar, Sara Lee, J&J, Merck, Chiquita Brands International, Gildan Activewear, and Hill-Rom. His extensive Manufacturing & Distribution background coupled with his VCP and Edge expertise makes him a natural fit for CSS.

Ecton's background will add significant muscle to an already strong delivery team. "CSS has the best talent in the industry, bar none. We work hard to make the company the most desired place to work and when you get talent like Kenny, you know you're right on the mark with that objective. He brings experience and an unrivaled reputation for his knowledge. CSS is delighted he's joined forces with us and is leading the team to great success," says Kirk King, CEO, CSS International.

## **About CSS:**

CSS is a leader in deploying Oracle enterprise solutions for mid- and large-sized companies. CSS offers a single source for all application, technology and process implementation and business process improvement needs. The CSS project approach is based on decades of industry experience, a unique Change Management program, sustainability and a deep-rooted sense of professional integrity. CSS exclusively supports the Oracle product line and is a multiyear Oracle North America Titan Award winner for excellence in sales, marketing and solution development and deployment. With an unmatched record of success, CSS has helped hundreds of companies implement complex technology solutions. CSS is headquartered in Charleston, SC, with operations throughout the United States.
